

New Pressure Sewer Main Project Begins Spring 2024

Construction Timeline

Project Background

The City of Post Falls Public Works Department is constructing a new pressure sewer main under 12th Ave. The new pressure sewer main will pump collected wastewater from the existing 12th Ave lift station to the City’s Water Reclamation Facility (WRF). The City plans to construct a 1-mile section of force main to the manhole at the intersection of Sugar Maple Road and 12th Ave.

Expected Impacts

In order to start constructing the new pipe, crews will excavate the road starting May 2024 as part of Phase 1. Work will start East and move West. Residents in the area may notice:

- Increased construction noise, vibration and dust
- Increased truck traffic and equipment in the area
- Phased road closures along Sugar Maple and 12th Ave
- Possible temporary driveway restrictions
- Pedestrian traffic might be affected
- Limited street parking

Work is anticipated to occur Monday – Friday between 7am – 6pm.

Utility interruptions are not planned as part of this project but could occur unexpectedly.

Notice: For safety reasons, residents should remain out of the work area. The affected portion of the road will be closed off with barricades and signage. Please remain out of the barricaded area and keep children and pets away from the construction.

Project Quick Facts

What: The City plans to construct a 1-mile section of force main to the manhole at the intersection of Sugar Maple Road and 12th Ave.

When: This project is scheduled to begin May 28, 2024, and anticipated to be completed late summer of 2024.

Why: The construction of a new pressure sewer main will pump collected wastewater from the existing 12th Ave lift station to the City’s Water Reclamation Facility (WRF).

How: The project has a construction cost of \$1,247,420.00, and is being funded through the wastewater collection fund.
